GRANT QUESTIONS & ANSWERS

What is the Response Equipment Grant

The Department of Fish and Game, Office of Spill Prevention and Response would like to provide a grant to any local government entity to provide response equipment that can be pre-position (pre-stage) throughout the state. The equipment will be deployed by the grantee to contain the spill or to protect local resources.

Who can apply for the equipment grant?

Any local public agency or tribe in the State of California, including cities, counties, tribal nations, fire departments, Port Districts, Public Utility Districts, and Emergency Management Departments.

Who will receive the equipment grant?

In order to be considered, agencies must be at risk of an oil spill occurring in their jurisdiction. Grant awards will be selected based on the following:

- Threat and magnitude of an oil spill in marine water
- Proximity to ecological sensitive sites
- The proximity of existing nearby response equipment or personnel
- Ability to deploy spill response equipment

Are there any fees associated with the equipment grant?

There are no fees, matching funds, or out-of-pocket expenses associated with receiving the equipment grant. If you chose to insure the equipment, your insurance provider may charge you to add to your policy.

Who can I contact for help?

Cindy Murphy, Contract Manager at (916) 324-6250 or cmurphy@ospr.dfg.ca.gov. Jeff Poteet, OSPS at (916) 323-6285 or jpoteet@ospr.dfg.ca.gov.

TRAINING QUESTIONS & ANSWERS

How long is the training?

Training will be eight hours in length.

What will the training consist of?

The training will consist of basic safety and equipment deployment including:

- Health and safety concerns when deploying equipment on oil spills
- Equipment familiarization
- Care, storage and maintenance of the equipment
- Booming techniques
- Spill reporting and notification
- Decontamination of personnel and equipment
- A practical hands-on deployment of the equipment
- Limitations of the equipment

Some jurisdictions are supplementing this training on their own with HAZWOPER/HAZMAT training and water safety/boat operations training. This training is designed to allow equipment users to safely deploy the equipment.

Who should be trained?

The people deploying the equipment should be trained. Additionally, individuals or organizations who are first responders in the county where the equipment will be stored and/or deployed may participate in training.

Can someone who has not been trained deploy the equipment?

Once an organization has ownership of the equipment, it is in their discretion to determine who may deploy the equipment. For the safety of all personnel, anyone who may deploy the equipment should be trained.

Who will provide the training?

Arranged by OSPR

Are funds available for backfill staff during training?

No funds are available for backfill staff during training. It is the responsibility of each individual agency to handle staffing issues during the scheduled training.

EQUIPMENT QUESTIONS & ANSWERS

What is the difference between the types of available equipment?

Determined by OSPR Staff

The available equipment is divided into three categories:

- General purpose see previous description of a typical cache
- River boom contains boom for deployment in water with mild currents
- Boom vane deployed with strong currents; does not require boat deployment

Where should the equipment be stored?

It is up to your organization to provide storage for the equipment trailer. Many agencies will store the trailer in a secure location near the water. Since the trailer can be moved, it may also be staged at a centralized location which can be easily accessed.

Does the response equipment need to be stored at a fire department or marina?

Not necessarily. You decide where you want to store the equipment. Fire departments are in a prime position to deploy the boom because of their 24-hour presence, staff numbers, training and equipment (boats). It is often beneficial to store the equipment at a marina because responders and the equipment can be staged at one location.

How do we determine the strategies needed to deploy the equipment?

The Department of Fish and Game, Office of Spill Prevention and Response has identified response strategies in areas that represent our priorities for the resources that we are charged to protect, but our strategies and priorities may not be the same as yours.

What happens when we use the equipment?

If the equipment is used for a response action that OSPR is involved in (any significant marine or inland aquatic oil spill), we will decontaminate your boom and replace any expendable equipment used (at the spiller's expense).

Will OSPR maintain the response equipment?

No. You will own the equipment; therefore the maintenance will be your responsibility.
